

4x4 Punch Challenge Rules - Update

After the first punch challenge event, a few changes were necessary for the next event. After a lot of consideration about penalty points time limits etc, it has been decided to keep things simple, so there will be two classes:

class 1 standard

no winches, no diff locks, no fiddle brakes, body work may be altered from original vehicle, max 2" suspension lift, waffle boards may be used, original fitment center diff lock allowed.

class 2 modified

winches, diff locks, fiddle brakes allowed, any suspension lift, waffle boards may be used.

At the end of the day there will be two winners, one from each class no overall winner.

The punches will be set out slightly differently with some of the punches accessible from one direction only, marked with tapes to follow. This is to make the final scores different for everyone. Hopefully, there will be at least two sections, where they will be classed as very hard, if necessary a trials type section will be laid out at the end of the day to find overall winners. We are still open to any ideas you may have. If you don't tell us they won't happen, tel John 01305-871578
